

Grain moisture tester Model EE-KU for Corn

GRAINSURE

The Grain moisture tester Model EE-KU is a compact moisture analyzer for corn. With a compact steel case, it is strong, durable and easy to handle. For the ease of use, it can be operated via 1 toggle switch to analyse and display the moisture content on the screen in a short period of time.

Specifications

- 1) Model : EE-KU
- 2) Type of sample : Corn
- 3) Weight of sample : 100 g.
- 4) Measurement range : 12.0 – 40.0%
- 5) Precision : less than 0.8% (range 12.0-20.0% of MC)
less than 2.0% (above 20.0% of MC)
- 6) Operating temperature range : 10 – 45 °C
- 7) Weight measurement method : Electronic digital scale ,resolution 0.1g.
- 8) Temperature compensation : Look up table
- 9) Temperature measurement method : Glass thermometer
- 10) Measuring method : capacitance
- 11) Display : 3-digit LCD resolution 0.1%
- 12) power supply : 9V 6F22 battery
- 13) Dimension (mm): 116x120x150
- 14) housing : Metal
